

WOMEN'S HEALTH PARTNERSHIP

The goal of our program is to decrease breast and cervical cancer mortality rates through outreach, education, and early detection strategies.

The four main components of the program are:

1. Maintaining an active community *volunteer coalition.*
2. Monitoring *quality clinical services.*
3. Providing *professional education.*
4. Increasing *public awareness* through *education and outreach.*

For more information about Women's Health Partnership activities, or to become a volunteer, please call:
